Dear Parents and Guardians:

David Thompson currently has the highest student population in the school's history. As the number of students has increased so has the rush at the beginning and end of the day. One of the main concerns and topics of conversation has been the layout of the staff parking lot. After consulting District Personnel, the best way to ensure the future safety of all students, staff, and parents is for pickup and drop off to take place outside of the parking lot. Please use the designated drop and roll section on Pine Springs Road. This will start in the New Year.

There are exceptions to this. Those with valid placards for people with disabilities are able to use the specified parking spaces. Another exception is picking up an ill or injured student. The four daycare vans transporting students are also able to continue using the parking lot.

Thank you in advance for your understanding and cooperation. I am sure all of us can agree that safety for everyone is the most important issue.

Yours truly,

Berni Linfitt

Principal
